Instructions

1. Cut the leather cord into three 6½" segments.
2. To wrap each segment of cord with floss, cut 36" of each color of floss and use a very small piece of tape to secure it to the end of the leather cord. Select and separate one color and pull the remaining colors flush to the leather cord. Wrap the selected color around the leather cord and floss. To alternate colors, simply begin wrapping with the next desired color around the leather cord and floss. When the end of the leather cord is reached, secure the floss to the cord with a very small piece of tape. Wrap all thread leather cords.
3. Select a wrapped cord to be the middle of the bracelet and add the cord coil closure its ends. Crimp the cord coil closure to secure.
4. To bind the cords together, align the three ends together flat (segment with the cord coil in the middle) and secure with tape. Cut a 36" length of floss and attach to the cord ends with a small piece of tape. Wrap the floss around the cord ends to hide the tape and create a decorative end. Repeat with the other end of the bracelet.
5. Attach the clasp.
